SRI LANKA

SRI LANKA EXPORT DEVELOPMENT BOARD

FORWARD

The Export Development Board, as the apex agency in promoting exports of the country, is mainly involved in export promotional and development activities in collaboration with the stakeholders through its core functional areas viz Policy Advisor, Monitor, Facilitator, Knowledge Provider, and Promoter.

Exports are one of the main pillars of growth for any economy and we need to transform debt-financed public investment and import substitution to a private sector-led Export and FDI-led development strategy. It is challenging but it is the only option available for Sri Lanka at present.

At this important juncture, the Sri Lanka Export Development Board presents its flagship statistical publication – “Export Performance Indicators 2023”. This edition provides information related to external trade as a whole and its contribution to major economic indicators such as trade balance, GDP, and individual sectoral involvement for the year 2023, and five preceding years. Historical data of selected important areas are provided for 10 preceding years. This volume is the 37th Volume of this publication, and its previous editions have been constantly used as a comprehensive and trustworthy reference by many researchers and policymakers.

The Data on the value of exports presented in this publication are expressed in USD. They are arranged by regions of exports; and by products/product groups. EDB identifies 21 global regions; 100 markets; 151 products/product groups. Changes in percentage shares and annual growth rates are also indicated for easy reference.

I wish to thank the Sri Lanka Customs and other government agencies that were generous in providing the EDB, with accurate data to be used in this publication.

EDB invites users of this publication to kindly provide feedback on the content and suggest improvements. This will enable us to continue this publication as a relevant and authentic reference for export-related statistics in the future too.

The Policy & Strategic Planning team of the EDB coordinated this work. I thank all officers who worked tirelessly to make this publication a reality.

Dr. Kingsley Bernard
Chairman / Chief Executive Officer Sri Lanka Export Development Board

ABOUT EDB

Sri Lanka Export Development Board (EDB) is the premier state organization entrusted with the task of developing and promoting exports from Sri Lanka. The EDB from its inception in 1979 engaged in developing and promoting products to the international market and currently expanded to the export services sectors.

The EDB plays five key roles as policy advisor, monitor, promoter, facilitator and knowledge provider with an ambitious plan to achieve its vision of “Position Sri Lanka as a Prominent Export Hub for Exclusive Products & Services”.

The Board of Directors of the EDB represents key Ministries and leading private sector entities at the highest level. To operate successfully, the organization is manned by a qualified and professional staff who are specialized in their respective areas of operation. The EDB works closely with other government, non-government, international agencies and private sector stakeholders with its strong relationship. The EDB actively support all stakeholders to implement the national plans.

The organization covers the entire island through a network of provincial offices, further enhancing opportunities for buyers and suppliers. Having evolved into a dynamic and a focused entity that is proactive in outlook, the EDB is constantly looking for new and innovative approaches to cater to the ever changing needs of the international market.

The EDB also focuses on broad-basing the beneficiaries of exports across the country with the objective of percolating the benefits of exports to the grassroots level. As a trade promotion organization, it assists SMEs to penetrate into new and existing markets by offering consultative services to small- and mid-sized businesses located throughout Sri Lanka conducting educational seminars and training programs designed for exporters and potential exporters in the region. The implementation of a series of regional export development programmes by the organization will lead to long term, sustainable economic growth by absorbing the talents and capabilities of the rural sector into the export development efforts of the country.

19. MARKET CONCENTRATION OF SRI LANKA'S EXPORT PRODUCT SECTOR

Concentration index is a statistical parameter which provides a measurement of the market concentration of certain product, a product sector or of all products of a country as a whole. Ideally lower the market concentrations lower the risk for exports due to market failure. Market should be discrete and the share of each market should be fairly equal, so that the collapse of one or a few markets will not seriously affect the product's overall exports. To analyse the said scenario and evaluate the concentration index the following formula has been used.

$$\text{Concentration Index} = \left(\sqrt{\left[\sum_{i=1}^n \left(\frac{x_i}{X} \right)^2 - \frac{1}{n} \right]} \right) \left(1 - \sqrt{\frac{1}{n}} \right) \times 100$$

X_i = A Product sector's exports to country i (i = UK, USA, Italy...)

X = Total of a product sector's exports to all countries ($X = X_1 + \dots + X_n$)

n = Number of buyer countries

This formula takes into account the export share in each market of a particular product and calculates an index which can vary between the limits zero and hundred. The optimal situation of the index would be when the concentration index is zero, which is when the shares are exactly equal among all the markets. At the other extreme, the value goes up to 100 if the market shares are drastically different from each other with the difference between the highest share and the lowest share being considerably large.

The calculated indices for the main export product sectors of Sri Lanka are tabulated below.

19.1. CONCENTRATION INDICES AND NUMBER OF DESTINATIONS BY MAJOR PRODUCT SECTORS 1990 - 2023

Table - 19.1.1

	Product Description	1990		2010		2017		2018		2019		2020		2021		2022		2023

The table reveals that all product sectors have diversified their number of destinations over the period of 1990 – 2023. Almost all the sectors namely Rubber & Rubber based Products, Diamonds, Gems & Jewellery & Boat Building have shown decreased level Concentration Index indicating the said degree of diversification in destination which is a healthy diversification position of the country.

20. SRI LANKA'S EXPORT BASKET - CONCENTRATION 2010-2023

Table - 20.1

Year	Export Value in Mn.US\$	No of Products @ HS 6 digit Level	HH Index %
2010	8,626	2534	2.47
2015	10,547	2883	1.94
2016	10,310	3058	1.83
2017	11,360	3199	1.91
2018	11,890	3162	1.81
2019	11,940	3099	1.72
2020	10,047	3669	1.78
2021	12,499	3831	1.66
2022	13,106	3743	1.57
2023	11910.7	2904	1.66

THE HERFINDHAL INDEX

This index is widely used to measure the concentration of products mix exported by the country and is defined as,

$$= \sum_{i=1}^n \left(\frac{x_i}{X}\right)^2$$

Where x_i is the export of commodity, X the country's total exports and N the number of export products. Index (%) approaching zero indicates less degree of concentration and index (%) approaching 100 implies a high degree of concentration.

27. CURRENT TREND IN GLOBAL DEMAND FOR SRI LANKA’S PRODUCTS - 2023

The following chart shows the performance of top 25 export products of Sri Lanka in the international market in 2023. The bubble denotes a particular product and the size of the bubble represents the amount of that product (in US\$ terms) we export to the world market.

Source : ITC Trademap

If the bubbles fall into the “**Winners in growing sectors**” (both high import growth and high increase in Sri Lanka's share), it means that the world demand for the product denoted by the bubble is increasing and also Sri Lanka's share of that product in world exports is also increasing. For example, Natural or cultured pearls, precious or semi-precious stones, precious metals, metals clad; into this category. **Trade promotion efforts for this product should aim to expand the supply capacity to cater to the markets with increasing demand.**

If the bubbles fall into the “**Losers in growing sectors**”, it means that the world demand for the product denoted by the bubble is increasing but Sri Lanka’s share of that product in world exports is declining. For example, Mineral fuels, mineral oils and products, Coffee, tea, maté and spices and Miscellaneous edible preparations; fall into this category. As this product face supply side bottlenecks, it is important to identify and remove the constraints in order to regain the market share.

If the bubbles fall into the “**Losers in declining sectors**”, it means that the world demand for the product denoted by the bubble is falling and Sri Lanka’s share of that product in world exports is also falling. For example, Articles of apparel, accessories, knit or crochet, Articles of apparel, accessories, not knit or crochet, and Rubber and articles thereof and Fish, crustaceans, molluscs, aquatic invertebrates nes, fall into this category. Trade promotion efforts for these products in this group should adopt an integrated approach to remove both the demand and supply side constraints.

If the bubbles fall into the “**Winners in declining sectors**”, it means that the world demand for the product denoted by the bubble is falling but Sri Lanka’s share of that product in world exports is increasing. For example, Edible fruit and nuts and Ships and Boats & floating structures; fall into this category. From a trade promotion perspective, niche marketing strategies are required to be adopted for these products.

The behaviour of exports of Sri Lanka as indicated above shows the importance of adopting product specific trade promotion strategies and measures to remove the specific demand or supply related constraints, which impede a more dynamic expansion of exports of the country. Such strategies would enable Sri Lanka to maximize on the opportunities generated in the global market and reap the maximum benefits from trade opportunities available for our export products.

28. EXPORTS OF HIGH-TECHNOLOGY PRODUCTS TO ACHIEVE ECONOMIC GROWTH OF SRI LANKA

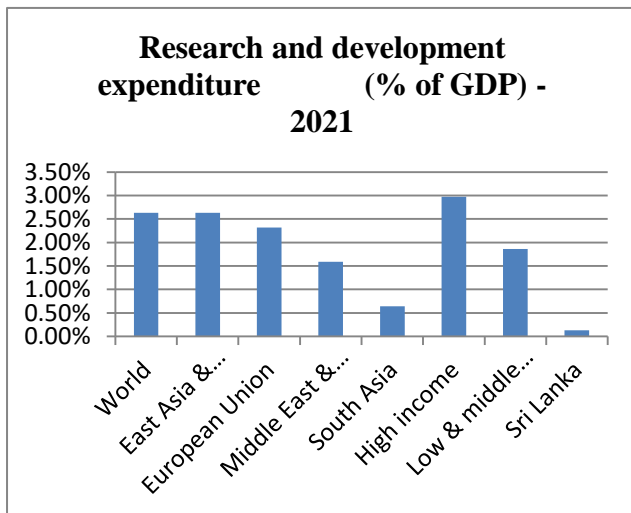

21. EXPORTS OF HIGH-TECHNOLOGY PRODUCTS TO ACHIEVE ECONOMIC GROWTH OF SRI LANKA

One of the key objectives of the Government is to transform Sri Lanka’s industrial sector into High – Value added, knowledge-based, globally competitive and diversified sector, which will then lead to the economic expansion of the country. A special emphasis has been given to product diversification through an outward looking growth strategy. While the government acts as a facilitator, the private sector drives exports of the country. Product diversification, introduction of innovative products, shifting from the existing traditional trade to non-traditional trade is very important to cater to the ever-changing global market.

Sri Lanka is a leading producer of many traditional & non – traditional products in the world. However, recognizing the changing paradigm in the international trade and Asia becoming the growth center in the world economy, it is important that the country to diversify its product basket with new and innovative products. Measures have been already initiated to establish Sri Lanka’s active participation in the Global Value Chains with a focus of creating a global center of excellence in high-end product engineering.

The following charts and tables illustrate some of the key aspects relating to High-Tech production and exports of Sri Lanka.
