SOFTWARE DEVELOPMENT

Transform your business with **high-performing**, **fault-tolerant**, and **scalable** solutions:

- **Specialised Development**
  - Bespoke solutions for unique business needs
  - Scalable architecture to support your growth
  - Cutting edge enterprise technologies

- **Software Modernisation**
  - Modernize legacy systems for improved performance
  - Enhance functionality and user experience
  - Optimize for cloud and mobile usage

- **Support & Maintenance**
  - L1, L2 and L3 capabilities
  - Proactive monitoring and issue resolution
 - Continuous improvement and optimization

Category	Technologies
UI / UX	Xd, Figma
Mobile	React Native, Flutter, iOS, android
Web	NEXT.js, ANGULAR, Vue
Backend	Java, Microsoft .NET, QUARKUS, Spring, python, node
Database	PostgreSQL, Microsoft SQL Server, DynamoDB, mongoDB, ORACLE, MySQL
Cloud	aws, Microsoft Azure

STAFF AUGMENTATION

- Business Analysis
- UI/UX Design
- Software Development
- Embedded Systems Development
- Data Engineering
- Quality Assurance
- Test Automation
- DevOps
- Maintenance

Amplify your capabilities with our **skilled IT professionals**:

- **Benefits**
  - Seamlessly integrate with your existing team
  - Capable of working client timezone or independently
  - Flexible engagement models
  - Access to a diverse talent pool
  - Save on administrative and HR related work and costs

- **Our Approach**
  - Rigorous vetting process
  - Ongoing support and management for resources
  - Regular performance evaluations

PRODUCT DEVELOPMENT

Turn your idea into action without compromising on scalability or reliability

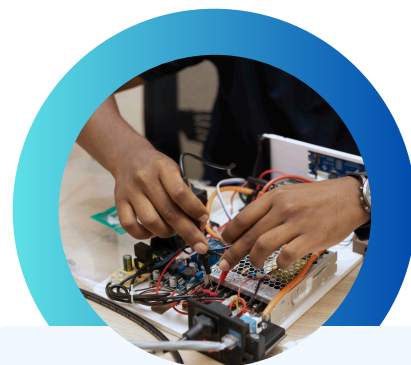

Rapid Prototyping

- Quick idea validation
- Iterative design process with user feedback integration

MVP Creation

- Core feature focus
- Faster time to market
- Early user acquisition

Product Scaling

- Architecture optimisation
- Performance enhancement
- Process optimisation (DevOps and Testing)

CASE STUDIES

CASE STUDY 1

DEVELOPMENT OF A MARKETING COMMUNICATION PLATFORM

Client: Leading Tutoring Franchise in USA

Problem: Existing platform had limited functionality in terms of personalising communications, scaling and did not support seamless integration between over 275 franchises and their students and parents.

Our Solution: Agile Product Design approach to develop a unified platform that automated communications, provided analytics on engagement, and automated payment processing for student enrollments.

Impact: Directly engage with 275 franchises and over 500,000 students and their parents/guardians.

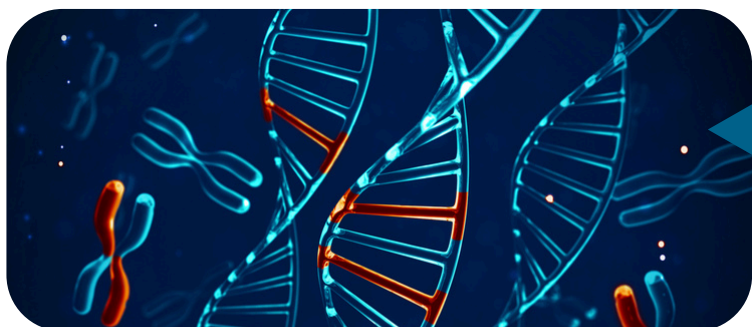

CASE STUDY 2

BIOTECH PRODUCT REENGINEERING

Client: Biotech Start up in San Francisco

Problem faced: Rudimentary visualisation application was struggling in scaling to meet more taxing demands and multiple users. Infrastructure costs as a result were also increasing severely.

Solution: Analysis and optimisation of existing architecture on AWS focusing on scalability, and sequence generating / visualisation.

Impact: Visualisation load times reduced by over 40%, capability to handle multiple users.

ABOUT AZEND

Azend Technologies brings together decades of experience in capital markets and enterprise solutions. Established in Sri Lanka, , Azend serves clients across the globe, from start-ups to established organisations in multiple industries.

OUR INDUSTRIES

| Education | Retail | Agriculture | Banking | BioTech |
